Offline map style manager (PRO only)

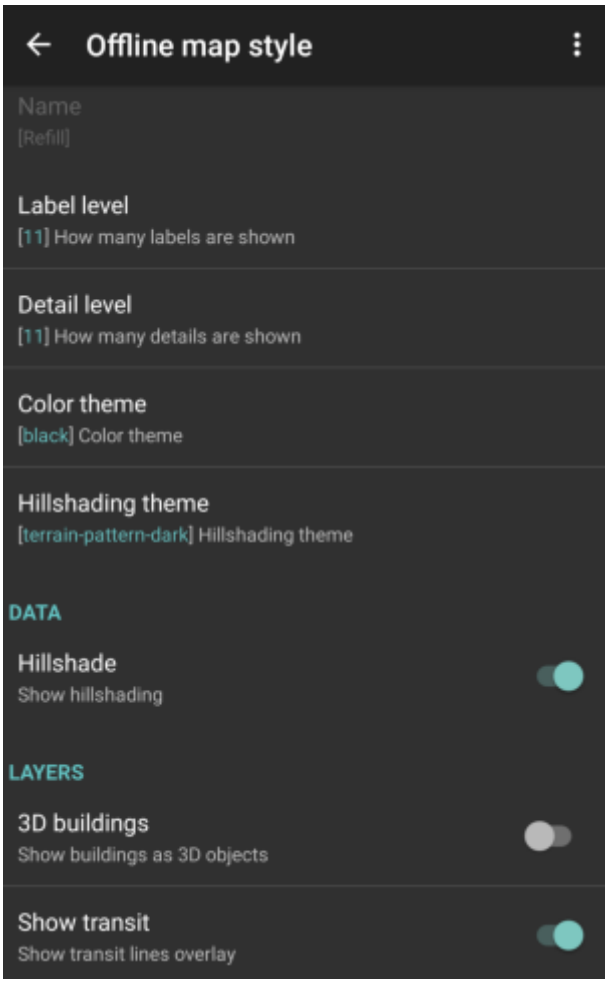
Offline map style manager is a setting where user can add, update and delete offline map styles. Map style is a layout to which the map data are loaded and in combination they create the final view the user is seeing.

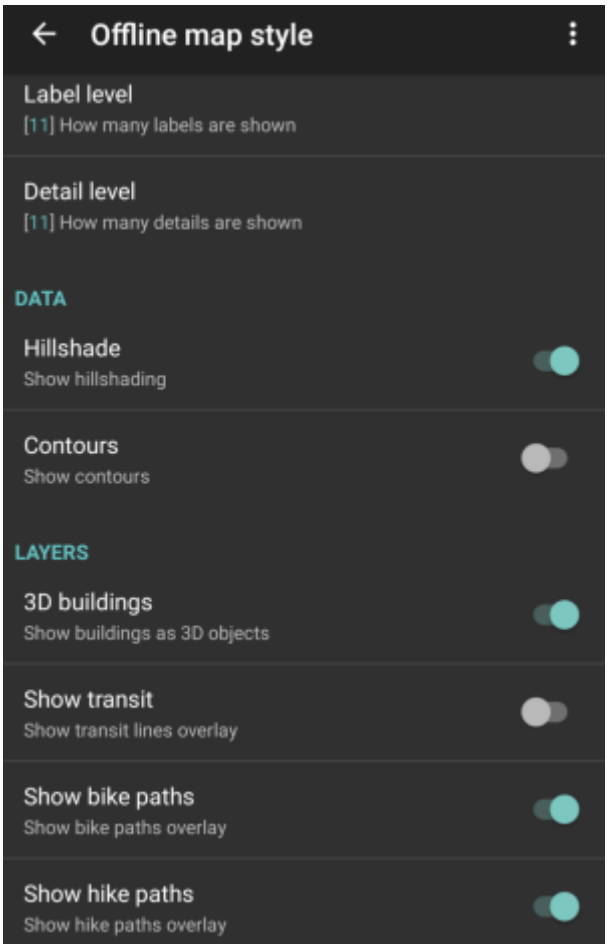
You can find out more about our offline map style here.

Each map style is customizable by clicking on the palette on its right side. The options are:

- **Add new offline map style** - to find out more how to add new offline map style please click here.
- **Edit** - editing options for current map style.
- **Use this offline map style** - by clicking on this option, your offline map style will be change to the one you are currently at.
- **Delete** - deleting of map styles.

Edit - editing option of the maps. Each map style has a different options to edit based on the profile of the map style.





- Offline map style and Name - not editable for default map styles.
- Label level - users can choose the level of labels; 0 - no labels of the objects visible on the map; 11 - all of the labels of the objects on the map. Not available for Basic, Street and Topo style. (On the pictures displayed levels 0,5,11.)
