

How to export and import application settings

While switching from free to pro version or switching between devices it is convenient to be able to keep the settings of the application that were previously set out. To keep the same settings among devices it is possible to export and import them.

Export of settings: In the original device or application please follow this path - Left main menu > Settings > Miscellaneous > Import/Export settings > Export > Choose the location of exported file > Confirm

Import of settings: In the new device or application please follow this path - Left main menu > Settings > Miscellaneous > Import/Export settings > Import > Choose the location of exported file > Confirm
