How to create generated icons

GPX Viewer upports starting/pausing, stopping and adding waypoints by automation with Tasker app. This how to will explain how this could be automated with Tasker app:

1. In Tasker add new task and add new action **System → Send Intent** with these parameters:

```
Send Intent [
  Action: android.intent.action.RUN
  Cat: None
  Mime Type:
  Data:
  Extra: android.intent.extra.TEXT:TRACK_RECORDING_ACTION_START_PAUSE
  Extra:
  Extra:
  Package: com.vecturagames.android.app.gpxviewer.pro
  Class:
  Target: Activity ]
```

For starting track recording add **android.intent.extra.TEXT** with parameter **TRACK_RECORDING_ACTION_START_PAUSE**, for stopping track recording change it to **TRACK_RECORDING_ACTION_STOP** and for adding waypoint change it to **TRACK_RECORDING_ACTION_WAYPOINT**.
