How to use offline map

Offline maps are available only in GPX Viewer PRO. So this how to won't work in the free version of GPX Viewer.

GPX Viewer PRO currently supports only offline vector maps based on OpenStreetMap data which can be downloaded directly in GPX Viewer PRO. For adding custom 3rd party offline map data, please follow the instructions in How to add custom offline map data

Below are step-by-step instructions on how to use the offline maps.

1. First off you need to start GPX Viewer PRO.
2. In **top toolbar** tap on **map** button **without globe**. If you have hidden this button previously, tap on **...** button in the top right corner of this top toolbar. In shown menu tap on **Offline map**. If you have also hidden this button, open left main menu, then tap on the **Settings** button. In the settings screen tap on the **Maps** button. Then tap on **Offline map data manager** button, when you do this you can continue to step 4 of this how to.
3. In **Offline map dialog** click on **Download** button at bottom.
4. In **Offline map data manager** tap on **+** button in bottom right corner and tap on **Worldwide low zooms** map data. In shown dialog tap on the **OK** button. This map data is only low-zoom data for the whole world. You also need to download detailed map data for a country or region. To do this, navigate to that country or region in shown directory structure and download it.
5. Then go back to the map screen.
6. In **top toolbar** tap on **map** button **without globe**. If you have hidden this button previously, tap on **...** button in the top right corner of this top toolbar. In shown menu tap on **Offline map**.
7. Tap on **switch** button in **top right corner** of **Offline map dialog** to enable offline map mode. In shown list, you can also select different offline map styles. Then tap on **OK** button.
8. GPX Viewer PRO will switch to an offline map and show it on the screen. If no map is shown, try zooming out to world-level zoom and then try to zoom in.
