# How to add offline maps style

Offline maps are available only in GPX Viewer PRO. So this how to won't work in free version of GPX Viewer.

Currently it is possible only to modify existing offline map styles available in GPX Viewer PRO and add new offline map styles based on these existing styles. Some styles have hillshading and elevation contours to be shown on the offline map. All styles support 3D buildings rendering and showing transit lines. Refill style has multiple color variants to experiment with.

Below are step by step instructions how to add offline maps style.

1. First off you need to start GPX Viewer PRO.
2. Open left main menu, then tap on **Settings** button. In settings screen tap on **Maps** button and then **Offline map style manager**.

Below is video showing following instructions above:
