File browser

How to get to file browser settings: Open Left Main Menu → Settings → File browser.

File browser settings cover work with storing and opening files.

Description of file browser settings items:

- **Clear history** - option to delete information about opened files.
- **External file browser** - use an external application to select and open files.
- **Reopen last files** - open the last opened files when the application starts.
- **Recursive counting** - show count of gpx, kml, kmz, and loc files also in subdirectories.
- **Open the last directory** - open the last opened directory in the File browser.
- **Show selected files count** - in the File browser show the selected files to count in the current directory.
- **Track/routes directory** - the setting of the default directory where tracks and routes should be stored.
- **Screenshots directory** - the setting of the default directory where screenshots taken within the application should be stored.
