Track recording (PRO only)

How to get to track recording settings: Open Left Main Menu > Settings > Track recording. Track recording is only possible in GPX Viewer Pro. Tracks are recorded in order for users to be able to store their past journeys.

- Profile Manager - specific settings for each recording profile.
- **Profile** - selection of profile for recording.
- **Select profile before start** - setting whether the recording profile should be chosen every time before the recording starts.
- **Show options to add links** - option to enable users to add links to tracks and waypoints when exporting them into the file.
- **Show stats in notification** - track recording statistics in notifications bar when track recording is enabled.
- **Show notification buttons** - track recording buttons in notifications bar when track recording is enabled.
- **Show continue track recording** - dialog to continue track recording when starting it.
- **Show stop confirmation** - when stopping the track, the window appears to confirm stopping.
- **Show open after export dialog** - show dialog asking whether to open exported tracks.
- **Line width** - width of the line displaying track, ranging from 3 to 26.
- **Draw outline** - draws white outline around the track line.
- **Color line by segments** - color of the line alters in similar shades based on the segmnts of the track.
- **Color line by data** - temporary disabled
- Colors - selection of automatic colors for recorded tracks.
- **Automatically export tracks** - after stopping the track recording, show dialog with track exporting options.
- **Automatically delete tracks after export** - deleting tracks from internal app memory after exporting them.
