Track/Route

How to get to track/route settings: Open Left Main Menu > Settings > Track/Route

General track/route settings that cover visualisation settings for tracks and routes:

- **Move to track/route** - use external application to select and open files.
- **Show icons** - open last opened files when application starts.
- **Show base icon** - show count of gpx, kml, kmz and loc files also in subdirectories.
- **Show preview** - open last opened directory in the File browser.
- **Resolve overlapping waypoints** - in File browser show selected files count in current directory.
- **Show direction icons** - Setting of default directory where tracks and routes should be stored.
- **Show distance icons** - Setting of default directory where screenshots within the application should be stored.
- **Distance of distance icons** - Setting of default directory where screenshots within the application should be stored.
- **Flat variance** - Setting of default directory where screenshots within the application should be stored.
- **Smooth data** - Setting of default directory where screenshots within the application should be stored.
