Exporting (pro only)

In GPX Viewer Pro, users have the ability to export the waypoints into the new GPX file. How to export the waypoints:

1. Open **Left main menu**.
2. Select **Waypoint info**.
3. Tap on the **three dots** underneath the waypoint division (opened/trackbook/recorded).
4. Select **Export** option.
5. Choose the location of the exported file within your directiories.
6. Set **File name**, **File description** and **File type**.
7. Choose the waypoints you want to be exported within this file.
