Exporting (pro only)

In GPX Viewer Pro, users have the ability to export the waypoints into the new file. The export can be done only within the specific waypoint source categories (opened/trackbook/recorded). How to export the waypoints:

- 1. Open Left main menu.
- 2. Select Waypoint info.
- 3. Tap on the **three dots** underneath the waypoint categories.
- 4. Select **Export** option.
- 5. Choose the location of the exported file within your directiories.
- 6. Set File name, File description and File type.
- 7. Choose the waypoints you want to be exported within this file.
