File browser

How to get to file browser settings: Open Left Main Menu > Settings > File browser

File browser settings cover work with storing and opening of files.

- **Clear history** - option to delete information about opened files.
- **External file browser** - use external application to select and open files.
- **Reopen last files** - open last opened files when application starts.
- **Recursive counting** - show count of gpx, kml, kmz and loc files also in subdirectories.
- **Open last directory** - open last opened directory in the File browser.
- **Show selected files count** - in File browser show selected files count in current directory.
- **Track/routes directory** - Setting of default directory where tracks and routes should be stored.
- **Screenshots directory** - Setting of default directory where screenshots within the application should be stored.
