

How to show graph below map

This how to assumes that you have already opened gpx or kml file in GPX Viewer. If you haven't opened it yet here is [How to open gpx or kml file](#).

Below are step by step instructions how to show graph below map.

1. To show graph below map simply **tap** on desired track/route line for which you want to show graph.
2. Graph is shown below map if it contains some data. There are several types of data, but most basic are **elevation** and **speed**. If track/route does not contain these data no graph will be shown, just empty space with text **No data**.
3. To show other type of data on graph, just **tap** on **button** showing three bars in **bottom left corner**. It will show you dialog with selection of various data.
4. By tapping on graph you can show position on track/route line.
5. By tapping on two arrows button in **top right corner** of graph you can enable **scaling** of that graph. **Scaling** can be done by **double tapping and moving fingers**. By **single tapping** you can **move** that scaled graph.

Here is video showing following instructions above:
