How to reverse the direction of a track

This how to assumes that you have already opened a gpx or kml file in GPX Viewer and you know how to display them on the screen.

Below are step-by-step instructions on how to reverse the direction of a track.

- 1. Open **left main menu** in GPX Viewer.
- 2. Tap on **Track/route info** button.
- 3. In the list of tracks and routes tap on the track you want to reverse.
- 4. Then scroll down below statistics.
- 5. Tap on the three dots on the right side.
- 6. Tap on Reverse direction button.
- 7. Confirm **Yes** in case dialogue that asks you to delete speed and time information from the track pops up.
- 8. Go back to the main map screen and the track/route direction will be changed.

Below is a video showing the instructions above:
