

Fix incorrect elevation when following GPS track recording

If you are encountering an issue that GPX Viewer PRO shows incorrect elevation when following GPS track recording, please follow step-by-step instructions below.

1. Open **left main menu** in GPX Viewer PRO.
2. Tap on **Settings** button.
3. Tap on **GPS** button.
4. Disable option **Elevation from air pressure**.

Below is a video showing the instructions above:

If this doesn't solve your problem, please create a ticket at our support system <https://support.vecturagames.com/gpxviewer>.
