## **Track/Waypoint Importing and Exporting**

In GPX Viewer PRO users have the ability to import and export the tracks and waypoints within their device.

## **Importing**

To import track or waypoint from your storage memory to the application you need to:

- Open ine the bottom menu bar either Tracks or Waypoints.
- After this screen displays in the top right corner you can find an Import button.
- Click on the **Import** button.
- Find the file from which you would like to import the Track/Waypoint.

Users can import tracks and waypoints from the same file.

On the picture below you can see

After the import, screen shows the number of imported tracks.

Afer a long tap on the file icon, the fllowing optios are displayed:

- Download
- Get info
- Rename
- Duplicate

- Quick Look
- Tags
- Copy
- Move
- Share
- Show in Enclosing Folder
- Delete

## **Exporting**

In GPX Viewer Pro, users have the ability to export the waypoints and tracks into the new file. The export can be done only within the specific waypoint source categories (opened/trackbook/recorded). How to export the waypoints:

- 1. Open the Track/Waypoint menu.
- 2. Click on the subject of your choice.
- 3. In top right corner tap on the share icon.
- 4. Choose the name also the type of file you wanna save.
- 5. Choose the tracks/waypoints you want to be exported within this file.
- 6. Press "Export" to export the file.
- 7. Choose "Save to files".
- 8. Pick the location to save the file.
- 9. Tap on save.
