# Offline map types

An offline map is a map that can be used when the device is **not connected to the internet**, however, it also works when the device is connected to the internet. Firstly you need to **download** them to your device. GPX Viewer PRO currently supports only offline map data which can be downloaded **directly** in GPX Viewer PRO, it does not support custom 3rd party offline map data as of yet. These offline map data are based on **OpenStreetMap data**. GPX Viewer PRO supports several **offline map styles** as shown in the screenshot below. Currently, it does not contain a style that is similar to the default OpenStreetMap map style, but we are working on adding this style to GPX Viewer PRO.
Previews of offline map styles

Below you can preview offline map styles which are available in GPX Viewer PRO to use for showing offline map data.

Basic

Most basic style with simple styling showing also points of interest. It allows the fastest rendering.

View Basic

Bubble Wrap

A full-featured city style loaded with helpful icons for points of interest.

View Bubble Wrap

Cinnabar

City style with simple colors and points of interest.

[View Cinnabar](#)

Refill

A minimalist map style designed for data visualization overlays. Inspired by the seminal Toner style by Stamen Design. Refill supports multiple color themes.

[View Refill](#)

Street

Street style tries to mimic default [OpenStreetMap](#) style.

[View Street](#)

Topo

Topographic style which tries to mimic [OpenTopoMap](#) style with contour lines.

[View Topo](#)

Tron

Will autonomous cars dream as they charge overnight? This style is pushing mapping to new extremes, and it will push your GPU and fan to the limit.

View Tron

Walkabout

This outdoor style is perfect for hiking or getting out and about, with mountains, ski trails, biking paths, and transit stops. Bike legend.
