

## File browser

---

**How to get to file browser settings:** Open Left Main Menu → Settings → File browser.

File browser settings cover work with storing and opening of files.

Description of file browser settings items:

- **Clear history** - option to delete information about opened files.
- **External file browser** - use external application to select and open files.
- **Reopen last files** - open last opened files when application starts.
- **Recursive counting** - show count of gpx, kml, kmz and loc files also in subdirectories.
- **Open last directory** - open last opened directory in the File browser.
- **Show selected files count** - in File browser show selected files count in current directory.
- **Track/routes directory** - setting of default directory where tracks and routes should be stored.
- **Screenshots directory** - setting of default directory where screenshots taken within the application should be stored.
