

## WMS manager

---

**How to get to WMS manager settings:** Open Left Main Menu → Settings → Maps → WMS manager.

You can find the manual on how to add WMS maps here: [How to add WMS map](#).

Each map style is customizable by clicking on the palette on its right side. The options are:

- **Add new WMS** - to find out more how to add new offline map style please click [here](#).
- **Stop using of WMS** - editing options for current map style.
- **Delete all WMS** - by clicking on this option, your offline map style will be change to the one you are currently at.
- **Show list of WMS** - deleting of map styles.
