2025/11/04 19:30 1/2 Track/route information

## **Track information**

Information about tracks/routes can be displayed by opening **Left main menu** → **Track/route info**. Here users can find tracks or routes categorised by their source:

- **Opened** from open gpx files stored in your device.
- Trackbook created in trackbook.
- **Recorded** recorded tracks on the device.

After tapping on any of them users can see the statistics and graphs analysing the track. Information displayed in statistics:

- **Flat/Climb/Descent length** divides the total length of the track between the distance travelled on flat, inclining and declining surface. Displayed only if elevation data are accessible.
- Length of the track/route. Available for every track.
- **Elevation difference** the difference in elevation between start and end point. Available if elevation data are recorded or downloaded.
- **Total climb** available if elevation data are recorded or downloaded.
- **Total descent** available if elevation data are recorded or downloaded.
- Start time and date of the track (only in case of recorded tracks).
- **End** time and date of the track (only in case of recorded tracks).
- **Duration** the overall duration of the track recording.
- **Duration(movement)** duration of movement during track recording (helps to distinguish times when
- Pace of the whole track vs recorded time.
- Pace(movement) through out the time while device was moving.
- Average speed of the track.
- Average speed (movement) of the track while moving.
- Maximum speed through out the whole track recording.
- **Maximum speed change** the greatest speed change within the track.

By clicking on the three dots under the statistics, editing menu is displayed with following options:

- **Set custom color** option to change the setting of the color. Applied only in the app, not altering the file where the track is saved.
- **Reverse direction** removes time and speed data of the track and changes the direction.
- Add elevation data downloads elevation data for the track from the internet.
- Show on map switches view to the map and shows where the track/route is located.
- **Show segments** shows the segments of the track, their distance from startpoint, length and any other additional information such as elevation or speed.
- Take screenshot takes a screenshot of current screen.
- Show file information after checking the checkbox, information about file where track/route is stored are displayed and editable. In case the file information are not shown, track/route is not stored in any file or comes from trackbook.
