

Waypoint information

The waypoint tab screen shows imported or added waypoints. You can also find information about importing waypoints on this page [this page](#).

To show waypoint details, tap on the waypoint in the list. Waypoint details contains this information:

- **Latitude and Longitude** - coordinates of the waypoints that can't be changed.
- **Color** - the color of the waypoint in hexacode, or also with the possibility to choose from a palette. Color can be changed only for the default symbol.
- **Symbol** - an icon that should be displayed to represent the waypoint. You have the ability to

choose the icon to represent the waypoint.

- **Name** - name of the waypoint
- **Description**, often carrying the information on how the waypoint was created
- **Comment** - comment for the waypoint
- **Source** - the device on which was the waypoint recorded
- **Type** - type of data

The eye on the top of the screen disables or enables the appearance of the waypoint on the map tab. Sharing button allows you exporting of the waypoint. More information about exporting can be found on [this page](#).

The screenshot shows the GPX Viewer Pro iOS application interface. At the top, the title 'Gasthaus' is displayed, with a back arrow on the left and a sharing icon on the right. Below the title is a 'Data' section containing the following fields:

Latitude	49,160686°	Longitude	22,458994°
Color	#FFDD0000	Color icon	●
Symbol	 Restaurant	Symbol icon	
Name	Gasthaus	Name icon	
Description	897 und Wetlina	Description icon	
Comment	897 und Wetlina	Comment icon	
Source		Source icon	
Type	user	Type icon	

At the bottom of the screen, there is a navigation bar with five icons: 'Map' (a map icon), 'Tracks' (a track icon), 'Waypoints' (a location pin icon, highlighted with a purple border), 'Trackbook' (a document icon), and 'Settings' (a gear icon). A black horizontal bar is positioned below the navigation bar.
